

 Colin Purrington [3] doesn't recommend Spartan Mosquito.

October 25 at 6:26 AM · 

The Spartan Mosquito Eradicator is a complete scam. I'm a scientist and have evaluated them carefully. I found that mosquitoes are not attracted to the devices at all. And I've corresponded with over 100 scientists and public health officials who all agree that the devices attract nothing but fruit flies, ants, picnic beetles, and yellowjackets. And everyone agrees that the solution inside (water, sugar, salt, and yeast) wouldn't kill mosquitoes even if mosquitoes managed to get inside (the holes are too small). Indeed, professionals openly laugh about this device and speculate why so many people leave glowing testimonials. But, sadly, it's not just a waste of money — it puts people at risk of contracting mosquito-borne diseases. I.E., if a person relies on this device instead of, say, DEET, they are putting themselves and their families at increased risk of getting bitten by a mosquito carrying EEE, West Nile, etc. This company is an embarrassment for the state of Mississippi, which should have never allowed it to operate in the first place. It should be shut down, and several states (perhaps all) are planning to do exactly that. I hope that happens before they start selling the things in Africa.
